

Post Surgery Instructions

1. Remove bandage in the morning. At that time, you may wash the area with soap and water, shower or bathe. Cleanse with hydrogen peroxide daily.
2. Apply antibiotic ointment at morning and bedtime.
3. You may need to bandage area during the day. You may leave the area unbandaged at night.
4. For any discomfort, you may take Tylenol or Extra-Strength Tylenol. Avoid aspirin products or Ibuprofen unless prescribed by another doctor.
5. Return for your follow-up appointment.
6. Contact the nurses for any unusual problems.
